

Inscriber CG·Supreme™

Inscriber CG·Supreme integrates a broadcast-quality character generator with a dynamic event sequencer for serious functionality. With CG·Supreme, artists can generate, sequence and play out stunning titles while maximizing turnaround. CG·Supreme combines creative power with simple usability, so you can optimize output and attract more viewers with impressive CG layouts.

Massive CG Design Control

CG·Supreme gives operators immense control over text output. With flexible text styles, a huge font selection and extensive text handling power, your broadcast text will look incredible. Whether you require colourful, graphics-intensive layouts, or clean, refined layouts, CG·Supreme makes it easy. CG·Supreme offers you the design power to meet the specific requirements of any broadcast situation, without a complicated interface or difficult learning curve. CG·Supreme brings you numerous fonts to work with, and works directly with any true-type font on your system. With that kind of selection, you're sure to find the perfect font for any CG layout.

Timesaving Templates and Text Styles

CG·Supreme is a timesaving application that will accelerate your production and smooth

out your workflow by offering convenient text styles and templates that reduce creation time. Text styles come with attributes already applied. But creating your own specific designs is simple with comprehensive control over all parameters, including the face, edge and shadow of every character. Additional text effects, including distort, depth and bevel, allow you to create titles with extra visual appeal.

Effects that Affect

CG·Supreme supports flawless stills, rolls, crawls and reveals, and gives you complete control over speed, direction and softness. Grab viewer attention by any means necessary. Make them sit up and watch with effects that demand their attention.

Event Sequencing

The CG·Supreme sequencer outputs your graphics with the efficiency necessary for on-air broadcasting. Split-second display capabilities mean operators can organize and send CG layouts to air instantaneously. With intuitive organizational tools, advanced transitions and triggers, the sequencer streamlines graphics programming for smoother on-air delivery. Get your CG layouts on-air with unprecedented precision.

Functionality for professional layouts

- Text on a curve or circle
- Logo import and manipulation
- Alpha-aware logo compose
- Spell Check
- Multiple graphic and text layers
- NTSC and PAL safe colour picker

CG·Supreme's powerful graphics creation toolset combines advanced functionality with maximum efficiency so that you can generate compelling CG layouts quickly and easily.

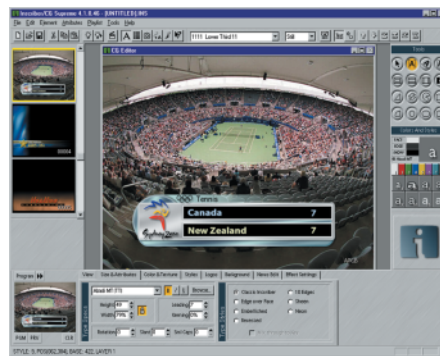

So go ahead, optimize your output with CG·Supreme.

CG·Supreme is also available as an Inscriber **LIVE!**System or a Value Pro Workstation. Inscriber **LIVE!**CGS is a broadcast-ready solution that is designed to handle the demands of a professional broadcast environment. Value Pro CG·Supreme is a high quality, PC-based, desktop computer system that offers the best price-performance ratio in the industry.

ODBC Option

Connect your Inscriber layouts to data in ODBC compliant files, such as Microsoft Access® or Excel®.
